FOR IMMEDIATE RELEASE

Universal Lighting Technologies Achieves High Recognition in Industry's First "Trusted Warranty" Evaluation Program

NASHVILLE, Tenn. (Feb. 1, 2021) – Universal Lighting Technologies, Inc. today announced the company is one of the first to be approved by the [National Lighting Bureau's \(NLB\) Trusted Warranty Evaluation Program](#).

The NLB Trusted Warranty Evaluation Program is the first program of its kind in the industry to recognize excellence in lighting companies that meet objective quality standards and practices regarding their warranty administration. The main intent of the program is to promote excellence in responding to warranty issues and to give industry stakeholders confidence in specific manufacturers that had their warranty program inspected. NLB promotes that Lighting Designers, Electrical Distributors, Electrical Contractors, and other Industry Stakeholders should feel comfortable specifying, buying, and installing luminaires from companies that have had their warranty department audited and approved by this program.

“For nearly 75 years, Universal has made its mark by offering high quality and efficient lighting products. In fact, we are known for our quality,” said Chuck Davis, director of technical and customer services at Universal. “For that reason, to be formally recognized by NLB for our long-standing quality is a huge moment for our team. The NLB is a trusted source of information for many in the industry, and we regard their program’s standards as some of the highest in the industry.”

The NLB is an independent, IRS-recognized, not-for-profit, educational foundation that has served as a trusted lighting information source since 1976. As part of its Trusted Warranty Program, the NLB assesses companies based on five key criteria: Formal Warranty Process, Warranty Language, Length of Business/Warranty Insurance, Technical Evaluation, and Claims Review Evaluation. In demonstrating quality and reliability across these five categories, companies give industry stakeholders confidence in their manufacturing.

About the NLB

The National Lighting Bureau is an independent, IRS-recognized not-for-profit, educational foundation that has served as a trusted lighting-information source since 1976. The NLB is focused on *Promoting*

Lighting Excellence™ and helping the lighting industry solve its business problems. The NLB exists to create demand for High Benefit Lighting®—efficient lighting designed to optimize human performance, health, safety, and commerce by educating and acknowledging those who make and influence decisions about lighting. The Bureau provides its services to the public free of charge, thanks to the generous funding of the organization's sponsors: professional societies, trade associations, labor unions, manufacturers, and agencies of the U.S. government. To learn more about the National Lighting Bureau, visit www.nlb.org.
